TROPICAL DISEASES BULLETIN

ISSUED UNDER THE DIRECTION OF THE HONORARY MANAGING COMMITTEE OF THE TROPICAL DISEASES BUREAU.

IMPERIAL INSTITUTE
6 AUG. 1914
LIBRARY

General Editor:
THE DIRECTOR OF THE BUREAU.

VOL. 3.

JANUARY 15, 1914—JUNE 15, 1914.

COMMONWEALTH MYCOLOGICAL INSTITUTE
26 MAY 1971

London:
TROPICAL DISEASES BUREAU,
Imperial Institute, S.W.

Sold by BAILLIÈRE, TINDALL & COX,
8, Henrietta Street, Covent Garden, W.C.

1914.

HONORARY MANAGING COMMITTEE.

Chairman:

The Right Honourable Sir J. West Ridgeway, G.C.B., G.C.M.G., K.C.S.I., LL.D.
(who is also Chairman of the Advisory Committee of the Tropical Diseases Research Fund).

Sir John Rose Bradford, K.C.M.G., F.R.S.
(representing the Royal Society).

Surgeon-General Sir David Bruce, C.B., F.R.S.

Surgeon-General Sir R. Havelock Charles, I.M.S., G.C.V.O.

Colonel Sir William B. Leishman, R.A.M.C., F.R.S., K.H.P.

Sir John M'Fadyean, M.R.C.V.S.

Sir Patrick Manson, G.C.M.G., F.R.S.

Sir Ronald Ross, K.C.B., F.R.S.

Sir S. Stockman, M.R.C.V.S.

Mr. J. A. C. Tilley
(representing the Foreign Office and Sudan Government).

Mr. H. J. Read, C.B., C.M.G.
(representing the Colonial Office),
with

Mr. A. Berriedale Keith, D.C.L., D.Litt.
of the Colonial Office, as Secretary.

STAFF OF THE BUREAU.

Director:

A. G. Bagshawe, M.B., B.C., D.P.H. Cantab.,
of the Uganda Medical Staff.

Assistant Director:

G. C. Low, M.A., M.D., *Lecturer, London School of Tropical Medicine.*

Librarian:

R. L. Sheppard.

Sectional Editors:

Andrew Balfour, C.M.G., M.D., D.P.H. Cantab.

Fleet-Surgeon P. W. Bassett-Smith, R.N., C.B., M.R.C.P.

Aldo Castellani, M.D.

Major S. Lyle Cummins, R.A.M.C., M.B., B.Ch.

Captain S. R. Douglas, I.M.S. (retd.).

H. B. Fantham, B.A., D.Sc.

Edward Hindle, Ph.D.

Colonel W. G. King, C.I.E., I.M.S. (retd.).

R. T. Leiper, D.Sc., M.B., Ch.B.

J. B. Nias, M.D., M.R.C.P.

F. M. Sandwith, M.D., F.R.C.P.

J. Henderson Smith, M.B., Ch.B.

C. M. Wenyon, M.B., B.S., B.Sc.

Warrington Yorke, M.D.

Editor of the Tropical Veterinary Bulletin:

A. Leslie Sheather, B.Sc., M.R.C.V.S.

CONTENTS.

SECTIONS.

	PAGES.
Amoebiasis (Amoebic Dysentery, Liver Abscess, Spleen Abscess)	63–81, 447–68
Applied Hygiene in the Tropics	333
Beriberi	319–24
Blackwater Fever	161–3, 261, 443–4
Book Reviews	59–62, 117–8, 176–8, 234, 321–2, 392–6, 445–6, 507–10, 567–70
Cholera	105–16, 469–90
Dengue and Unclassed Fevers	328–30
Disease Prevention	353–82
Dysentery (Bacillary, Ciliate, Flagellate, and Unclassed)	81–9, 226, 458–68
Errata	396, 570
Filariasis	96–104, 315–8
Helminthiasis	285–99
Insect Transmitters of Disease	262–5
Kala Azar	130–43, 543–62
Leprosy	187–200, 491–506
Linguatulida Infections	276–7
Malaria	47–59, 144–60, 256–60, 353, 431–42
Miscellaneous	225–33, 280–4, 325–7
Myiasis	273–5
Pellagra	300–14
Plague	201–9
Protozoology	119–29, 511–26
Rat-Bite Fever	278-9
Relapsing Fever	1–20, 397–406
Reports, Annual	333–52
Sanitary Legislation	383
Sanitary Works	387–91
Skin Diseases, Tropical	235–40
Sleeping Sickness	21–46, 164–76, 243–55, 407–30, 527–42
Snake Bite	266–72
Sprue	94–5
Treatment of Waste	384–6
Typhus Fever	563–6
Undulant Fever	210–19
White Race, The, and the Tropics	220–5
Yaws	241–2
Yellow Fever	179–86

Index of Authors	571–579
Index of Subjects	581–622
Quarterly Lists of References	Appendix, pp. vii–xxxviii, xxxix–lxxxii.

ILLUSTRATIONS IN THE TEXT.

Apparatus for Cultivation of Malarial Plasmodia *in vitro* 439
Branched form of *S. rubrum* 406
Chinese Flea-Trap 380
Cultures of Malarial Plasmodia 440
Infiltration Galleries 390
Map showing distribution of Kala Azar in China 131
Pipettes for obtaining Stained Preparations of Cultural forms of Flagellates in Kala Azar 137
Plans of Freetown, Sierra Leone, shewing Anopheles Breeding-places.. 368–369
Protozoa-like Bodies in Blood, and in Spleen of Patient with Protracted Fever and Splenomegaly (Castellani) 522
Rat-guard for Ship's Lines 371

MAPS.

Outline Map of Western Province, Uganda Protectorate (to illustrate abstract of Dr. H. L. Duke's paper) .. *facing* 33
Sketch Map showing Nyasaland Protectorate and adjoining Territories .. .. *on* 22

PLATES.

Crithidia hyalommae, ... *facing* 123
Typical Examples of *Amoeba* and *Entamoeba* .. .. „ 64
Typical Sites for Collections of Pupae of Glossina .. „ 43

TABLES.

Table giving the Salient Characters of the More Important Mammalian Trypanosomes .. .. .. *facing* 428

ERRATA.

p. 69. LESK's paper, lines 12 and 13, the expression "gave a vague history of having had dysentery some months before" is incorrect; the German original is to the effect that the boy had already suffered for some months from dysentery, and the sentence should be amended by the insertion of the word "for" before "some months."

p. 295. DE ALMEIDA'S paper, lines 12 and 14, for "tabloid" and "tabloids" read "tablet" and "tablets," or some other equivalent of the Portuguese word "comprimidos," the word "tabloid" being the registered trade mark of Messrs. Burroughs Wellcome & Co.

p. 432. STEPHENS' paper, last line, for "*Plasmodium pertenue*" read "*Plasmodium tenue.*"

Plague—*cont.*
Rat
B. pestis from, morphology of, 207
Incidence
America (California), 207
China, 207
Italy, 207–8
Prophylaxis, 207–8

Septicaemic
Incidence
Ceylon, 367–70
India (Madras), 370

Porocephaliasis, *see under* **Linguatulida Infections**

PROTOZOOLOGY (excluding most Amoebae, and most Trypanosomes), 112–29, 511–26
Acipenser ruthenus, *Haemogregarina ascipenseris* (?) from, 513
Agrippina bona, nuclear structure and sporulation of, 125
Amoebae from
Air, food, and dust, 514.
Human stools, French Guinea, 119
of Non-dysenterics, 513–4
Encysted, longevity of, tests of, 514–5
Limax-type in culture from faeces, 513
Anaemia of rodents, freely bitten by *C. fasciatus*, due to *Herpetomonas pattoni*, 515, 516
Anaplasma, coccoid bodies in 126
Ancyromonas genus, 121
Anguilla vulgaris. Tryp. granulosum (and others) from, 524
Anopheles maculipennis, flagellates of, 122, 123
Asilus, *Leptomonas* from, 120
Bacillus krusei infection in frog; results, 524
Balantidia, classification, &c., of, 514
Balantidium coli, in monkey, 120
Bird-fleas, transmission experiments with, 121
Birds, diseases of, due to *Haemoproteus*, 517–8
Parasites from, 511, 512, 513
Blood conditions and diseases, *see also* Erythrocytes, *and* Leucocytes
in Birds, due to *Haemoproteus*, 517–8
in Pigeons, with *Toxoplasma canis* infection, 521

Protozoology—*cont.*
Blood parasites (and their transmission) of
Chaffinches, 121
Water frogs, 121–2
Bodo genus, 121
Bone marrow, Kurloff bodies in, 524
Bycanistes albotibialis, trypanosome from, 512
Bulbar paralysis, experiments in, 519–20
Calliphora erythrocephala infection of, by *Nosema apis*, 128
Cats, immunity of to *E. tetragena*, French Guinea, 119–20
Cattle, hereditary infection of, by tick-crithidia, 123–4
Trypanosomes in, Haut-Senegal-Niger, 119
Ceratophyllus fasciatus, agent of rat and mouse infection by *Herpetomonas pattoni*, 515–6
Larvae of, *Agrippina bona* in, 125
Transmission experiments with, 120, 515–6
C. gallinae, 121
Cercomonadidae, classification, &c., of, 514
Cercopithecus monkeys, *Plasmodium kochi* from, 119, 512
Chaffinch, blood-parasites of, transmission of, by fleas, 121
Chlamydozoa, and Kurloff bodies; comparisons, 524–5
Chrysozona vanden brandeni, crithidia from, 120
Ciliates from air, dust, and food stuffs, 514
Cinixys belliana, *Plasmodium roumei* from, 119
Cletus bisbipunctatus, Leptomonas from, 120
Coccidia, *Varanus* haemogregarines as belonging to, 519
Coccoid bodies in
Anaplasma, 126
Grahamella, 126
H. simondi, 126
Spirochaetes, 126
Cosmolestes pictus, Leptomonas from, 120
Countries from which observations are noted
Brazil, 127–8, 519, 521
Ceylon, 521
China, 511
Cochin-China, 514
Congo, Belgian, 120
French, 512

Protozoology—*cont.*
Countries from which &c.—*cont.*
Egypt, 123–4
Eritrea, 519
France, 523
French Guinea, 119–20
Gambia, 518
Germany, 513
India, 511
Italian Somaliland, 519
Italy, 121
Martinique, 511
Russia, 513
South Africa, 518
Switzerland, 523
Tunis, 520
Crithidia, origin of, discussed, 121
C. fasciculata from *Anopheles maculipennis*, 123
Culex pipiens, 121, 517
C. hyalommae, in Egyptian cattle, morphology, biology, and transmission by ticks, 123–4
C. melophagia, feeding experiments with, on mice, 516
Hereditary infection by, of *Melophagus ovinus*, 124
C. pangoniae, 120
C. tenuis, 120
C. vacuolata, n. sp., from a reduviid, 120
Crithidial flagellate from *S. fasciata*, 511
Ctenocephalus canis, Herpetomonas of, experiments with, 122
Culex pipiens, crithidia or flagellates of, 517
Natural host of *Crithidia fasciculata*, 121
Cultural amoebae from faeces, 513
Cynocephalus, *Balantidium coli* from, 120
Dactylosoma ranarum, biology of, 122
Dendrocoelum lacteum, *Tryp. dendrocoeli* in, 125
Diptera and *Nosema apis* infection, 128
Dogs, Toxoplasma of, researches on, 127–8, 520
Donkeys, trypanosomes of, French Guinea, 119
Duration of life of various kinds of protozoa, 514–5
Dust, amoebae, flagellates, and ciliates from, 514
Eels, *Tryp. granulosum* (and others) from, 524
Elleipsisoma thomsoni, in moles, 121, 523
Eimeria prevoti, in frogs, 122

Protozoology—*cont.*
Entamoebae, classification &c., of, 514
E. coli cysts in non-dysenteric faeces, 513
E. tetragena, cat-immunity to, French Guinea, 119–20
E. tetragena-like amoebae in stools, 119
Eosinophile leucocytes, Kurloff bodies in relation to, 524
Erythrocytes of moles, containing Graham-Smith bodies, 522–3
Smithia talpae, 523
Euphorbia indica latex, Leptomonas from, 120
Fish, parasites from, 513
Falco tinnunculus, *Haemoproteus danilewskyi falconis* from, 518
Flagellates from
Air, dust, and foodstuffs, 514
Ctenocephalus canis, and *Anopheles maculipennis*, 122–3
Flies, 124
Insects, Belgian Congo, 120
Invertebrates, in relation to trypanosomes of vertebrates, 516
Non-dysenteric stools, 514
Longevity of, tests of, 514
Flatworms, *Tryp. dendrocoeli* in, 125
Fleas, transmission experiments with
Bird-fleas, 121, 125
Rat-fleas, 120
Rat, gregarine larvae in, 125
Herpetomonas pattoni transmission by, 515–6
Trypanosoma lewisi transmission by, 120
Flies, *see also* Diptera, *and* Hippoboscid
Herpetomas of, development of, 124
Herpetomonas danilewskyi transmitted by, 518
Food materials, protozoa from, 514
Frogs, *Bacillus krusei* and *Tryp. rotatorium* infection in: results, 524
Water frogs, blood parasites of, transmission of, 121–2
Goats, new types of protistan parasite from, 515
Selenomastix from, 121
Golunda fallax, *Grahamella* from, 119
Gondi, Toxoplasma from, 121, 127
Graham-Smith bodies, in mole-erythrocytes, 522–3

Protozoology—*cont.*
Grahamella, coccoid bodies in, 126
in *Golunda fallax*, 119
in Rats, 119,
G. talpae, 121, 523
Granule-shedding in parasites, 126
Gregarine, *Agrippina bona*, from rat-flea larva, 125
Guinea-pigs, Kurloff bodies in bone-marrow of, 524
Pulmonary cysts in, after trypanosome inoculation, 523-4
Trichomonads from, 517
Haemamoebae
Haemamoeba liothricis in *Liothrix luteus*, 511–2
H. majoris, 511
H. tenuis, *in Liothrix luteus*, 511
H. ziemanni, 511
Haemogregarines, classification of, 512, 519
from Monitor, life-cycle of, 518–9
Haemogregarina ascipenseris (?) from sturgeon, 513
H. esocis n. sp., from pike, 513
H. minima, synonym for, 122
H. simondi, coccoid bodies of, 126
Granule-extrusion by, 126–7
H. toddii, 519
Haemoproteus, or Halteridium genus
H. columbae, flies transmitting, 518
H. danilewskyi in birds, 518
Flies transmitting, 518
Haemosporidia, 120
Halteridia (Haemoproteus), in birds, 121, 518
Halteridium fringillae, 121
Hemiclepsis, and transmission of frog-trypanosomes, 121, 122–3
H. marginata, parasites in, 122
Hemiptera, as hosts of Leptomonas, &c., 120
Hereditary protozoal infection, *see* Cattle
Herpetomonads
Herpetomonas ctenocephali, experimental infection with, 122–3
H. pattoni from *C. fasciatus*, rat infection by, 515
Experimental, by various methods, 515, 516
Natural, by bites, 515
Three types of, 516
H. stratiomyiae, developmental stages of, 124
Herpetomoniasis, experimental, in white mice, 516

Protozoology—*cont.*
Hippoboscid fly, transmitter of *Herpetomonas danilewskyi columbae* in S. Africa, 518
Horses, trypanosomes in, French Guinea, 119
Hyalomma aegyptium, crithidia infecting, 123–4
Hymenoptera, other than bees, *Nosema apis* pathogenic to, 128
Infective granule in life-history of protist organisms, 126
Infusoria, life-length of, in sealed flasks, 514
Insect flagellates, Belgian Congo, 120
Insect transmission, *see* Fleas, Flies, Ticks, &c.
Insects other than bees, to which *Nosema apis* is pathogenic, 128
Intra-cellular stage in *Tryp. dendrocoeli*, 125
Isospora lieberkühni in frogs, 122
Japanese nightingale, haemamoebae and toxoplasma in, 511–2
Kestrels, *Haemoproteus danilewskyi* of, 518
Kurloff bodies, morphology of, 524–6
Researches on, 121, 128–9, 524
Lamblia cysts in non-dysenteric stools, 514
Land tortoise, plasmodia in, French Guinea, 119
Lankasterella minima, in frogs, synonyms for, 122
Leishmania forms in experimental infection with *Herpetomonas ctenocephali canis* and *Crithidia fasciculata*, 122–3
Granule-shedding in, 126
Lepidoptera, *Nosema apis* infection in, 128
Leptomonad flagellate of *Culex pipiens*, 517
Leptomonas, from Hemiptera &c., 120
L. mirperi, 120
Lettuce-leaf infusion, amoeba from, 514
Leucocytes, eosinophile, Kurloff bodies in relation to, 524
Leucocytogregarina, 512
New species of, 519
L. arvalis, n. sp., 519
L. cuniculi, n. sp., 519
L. plicata marmotae, n. sp., 519
L. rotundata canis familiaris, n. sp., 519

Protozoology—*cont.*
Leucocytozoa, 512
Leucocytozoon struthionis, morphology of, 126
Liothrix luteus, haematozoa and trypanosome in, 511–2
Lymphocytozoon cobayae, developmental stages of, 524
Lynchia genus of flies, *Haemoproteus danilewskyi* transmitted by, 518
Mammals, new leucocytogregarines from, 519
of Man, pathogenic, present day knowledge of, reviewed, 514
Melophagus ovinus, hereditary infection of, by *Crithidia melophagia*, 124
Infection of, by *Nosema apis*, 128
Mice, *Crithidia fasciculata* infection in, 123
Graham-Smith bodies from, 522, 523
Herpetomonas pathogenic to, 122, 515–6
Toxoplasma gondii infection in, 520
Trichomonads of, 517
Micro-spirillum in *Stegomyia fasciata*, 511
Microsporidiosis in insects, from *Nosema apis*, 128
Mirperus jaculus, Leptomonas from, 120
Moles, blood parasites of
Elleipsisoma thomsoni, 121, 523
Graham-Smith bodies, 522, 523
Smithia talpae, 523
Monitor, hæmogregarine from, life-cycle of, 518-9
Monkeys, *Balantidium coli* from, 120
Plasmodium kochi in,
French Congo, 512
French Guinea, 119
Mosquitoes, *see Anopheles, Culex, and Stegomyia*
Bacteria of, 511
Crithidia of, 123, 511, 517
Flagellates of, 122, 123, 511
Spirochaetes from, 511
Yeasts from, 511
Mus rattus, Grahamella from, 119
New type of protistan parasite from goats, &c., 515
Nosema apis, pathogenicity of, to insects other than hive bees, 128
Oikomonas termo from dry-preserved bark-paper, 514-5
Olfersia capensis, as transmitter of *Haemoproteus danilewskyi columbae*, 518

Protozoology—*cont.*
Ostrich, Leucocytozoon found in, 126
Pathogenic protozoa, of man, classification, &c., discussed, 514
Pigeons, *Haemoproteus danilewskyi* from, 518
Kurloff bodies in bone-marrow of, 524
Nervous system of, as seen after *Toxoplasma canis* inoculation, 520–1
Trichomonas columbae in, 124–5
Pike, *Haemogregarina esocis*, n. sp., from, 513
Trypanoplasma gurneyorum from, 513
Trypanosoma remaki, var. *magna*, from, 513
Pirrhocorides larva, Crithidia from, 120
Plasmodia, classification &c., 514
Plasmodium kochi, in monkeys, 119, 512
P. roumei, in land tortoise, 119
Pneumocystis carinii, 523–4
Proflagellate in goats, 515
Protozoa from food-materials, 514
of Soil, 121
Protozoa-like bodies in splenomegaly, Ceylon, 521-2
Pulmonary cysts in
Guinea-pigs with various trypanosome infections, 523–4
Rats, with *Trypanosoma lewisi*, 523
Rabbits, enlarged spleens of, new Leucocytogregarina from, 519
Trypanosoma rhodesiense infection in; results, 524
Rana esculenta, haemogregarine infection in; results, 524
Grahamella from, 119
Inoculated with *Herpetomonas ctenocephali*, 122–3
Infected with *Herpetomonas pattoni* from *C. fasciatus*, 515–6
Rats, Graham-Smith bodies from, 522, 523
Parasites of, in French Guinea, 119
Trypanosoma lewisi in, 119
How transmitted, 120
Pulmonary cysts present with, 523.
Rat fleas, *see Ceratophyllus fasciatus*
Reduviids, Crithidia and Leptomonas from, 120

Protozoology—*cont.*
References to literature, xxxvii–viii, lxxviii–lxxx.
Rhinocoris albopilosus, flagellates from, 120
Ruminants, new protistan parasite from, 515
Selenomastix from goats, morphology of, 121
S. ruminantium, from goats, &c., 515
Serinetha, Leptomonas from, 120
Smithia talpae, n. sp., in mole's blood, 523
Soil, protozoa of, 121
Spirochaetae, classification, &c., of, 514
Coccoid bodies in, 126
S. refringens, one like in *Stegomyia*, 511
Spleen, hypertrophied, Ceylon, protozoa-like bodies in, 521
Sporozoa, classification, &c. of, 514

Infection (*see* Surra), and abscess of fixation, 249.
in Rats, antigen from, 425
in Lanfranchi's laboratory, 408 *n.*
in *Tab. striatus* Fabr., 31
T. frobeniusi Weiss., features of, 423
T. gambiense, 245, 417, 429
Action on, of
Sieg's serum, 534
Silver salts, 532
Development in glossina, 28, 429
Dimorphism of, 540
Distribution of
Tanganyika shores, 527,
Victoria Nyanza shores, 527
Forms like, in game, &c. Uganda, 32, 33, 34, 43
and *G. palpalis*, 420
Infection in Mice, action in of silver salts, 532
Inoculation with, 168
in Irido-cyclitis case, 409
Pathogenicity of, compared with *T. nigeriense*, 528
Salient characters of, 428 & *table*
and *Stomoxys*, 30 *n.*
Transmission experiments with 27, 168, 244–5
and *T. rhodesiense*, identity of, 344

Sleeping Sickness—*cont.*
Trypanosomes—*cont.*
T. gambiense group, risks from Uganda, 420
T. grayi, in *G. palpalis*, Tanganyika, 175
T. of Human trypanosomiasis, German East Africa, comparative observations on, and *T. brucei*, 246
Transmission, experimental with mosquitoes, 244–5
T. inopinatum, synonyms for, 122
T. lagonostictae, n. sp., distribution, 430
T. lewisi, action on, of
Arsenic, 404
Iodine, bromine and osmic acid, 38
Staphylococcus vaccine, 38
Trixidin, 414
Weak electric currents, 414
Arsenic resistance of, modification of, 404
and Erythrophagocytosis, 26
Pathogenicity of, 542
in Rats, 44
Transmission of, 29
by *Haematopinus spinulosus*, effect on arsenic resistance, 404
T. liothricis, n. sp., source and distribution, 430
T. nanum, features of, 423
from Game, &c., 32, 33
Transmission experiments with, 27
and *T. congolense*, probable identity, 169, 254, 416
Where developed in Glossina, 429
T. nigeriense, distribution in Southern Nigeria, 528
and Erythrophagocytosis, 26
Pathogenicity of, 528
Transmission experiments with, and *Stomoxys*, 291
T. pecaudi in cattle, &c., 253, 423–4
Differentiation of, 40
Nomenclature, 416
Transmission experiments with, 27
and *T. ugandae*, 171
Where developed in Glossina, 429
T. pecorum, 39, 417
Features of, 423
Identity of, with *T. congolense*, 169
Transmission experiments with, 27
in Wild animals, 32, 33

Sleeping Sickness—*cont.*
Trypanosomes—*cont.*
T. rhodesiense, action on, of
Arseno-silver compounds, 37
Sieg's serum, 534
Silver salts, 531, 532
Trixidin, 533
Differentiation of, 40
Dimorphism in, 539, 540
Distribution in German East Africa, 420–1, 527
and Dourine, 40
in Game, &c., 24
Forms like, in game, &c.
German East Africa, 417
Uganda, 34
Identity with *T. brucei* discussed, 171, 415–7
with *T. gambiense*, 344
and Nagana, 170
Non-flagellar forms, in experimental animals, morphology of, 171
Salient characteristics of, 428 & *table*
Transmission experiments with, 26, 27, 244–5
Where developed in Glossina, 429
T. rotatorium, 191
Synonyms for, 122
T. simiae, transmission experiments with, 27
Where developed in Glossina, 429
T. soudanense, identity of, 254
T. theileri, cultivation experiments with, 541
in Experiments with single trypanosomes, 430
T. togolense, 407
T. tritonis, morphology of, 46
T. ugandae, action on, of
Sieg's serum, 534
Trixidin, 533
Differentiation of, 40
Nomenclature, 416
T. uniforme, from wild animals, 32, 33
Transmission experiments with, 27
Where developed in Glossina, 429
T. vespertilionis in Bats, in France, 169–70
T. vivax, action on, of
Iodine, bromine and osmic acid, 38
Trixidin, 533
Forms resembling, from buffalo, &c., 32
Large animals as hosts of, 420
in Rabbits, *see* Transmission

Sleeping Sickness—*cont.*
Trypanosomes—*cont.*
T. vivax, &c.—*cont.*
Salient characters of, 428 & *table*
Transmission experiments with, 27, 168–9, 424
Where developed in Glossina, 429
Tsetse-fly, *see* Glossina

Trypanosomiasis
Animal
Antibodies in blood, when treated by salvarsan, 173
Auto-erythrophagocytosis, in diagnosis of, 26
Bovines, action on, of virus of Ghindi, 45
in Cattle, Ashanti, 165
Chemotherapy, 247–8
Diagnosis by serum reactions, 536–8
in Frogs, and their immunity, 45
in Game and wild animals, 31–5, 416, 417–8
G. pallidipes as vector, 44–5
in Horses, with posterior nuclear forms, 170–1
and Immunity, 415
Incidence
Algeria, 254
France, 169–70
German East Africa, 249, 417–8, 421–3, 539
Gold Coast, 171
Italian Somaliland, 44
Ivory Coast, 421
Kamerun, 28
Luangwa region, 23–4
Nigeria, Northern, 170
Southern, 171, 333
Portuguese E. Africa, 171
Senegal, 44
Sierra Leone, 262
Uganda, 31–5, 419–21
Upper Niger, 254
Upper Senegal and Niger, 253
Zululand, 38
Mice with *T. evansi*, *rhodesiense* or *dimorphon* infection, action on, of silver salts, 532
Prophylaxis, 423–4, 427
Transmission
Experimental, 32 *et sqq.*
Natural, by
Glossina (q.v.), 44–5
Sexual intercourse, 29
Stomoxys, 45
Tabanidae, 45

Sleeping Sickness—*cont.*
Trypanosomiasis—*cont.*
Animal—*cont.*
Treatment by
Antimony compounds, 401
Salvarsan, 173
Terebene essence, 249
Trixidin, 249
Vaccines, 421–3

Debab, in Dromedaries, virus of, 254

Dourine
Diagnosis by
Complement fixation, 424–5
Serum reactions, 536–8
Transmission
Experimental, 538
Natural, 29
Treatment by antimony compounds, 401
Trypanosomes of, 407
Morphology of, 39–40

Ghindi, notes on, 44–5

Gobiat, notes on, 44–5

Mal de Caderas, Amazon region, 227
Capybara as host of parasite of, 227
Trypanosome of, transmission of, 30

Nagana, *T. brucei* (ferox) infection
Action on, of
Antimony compounds, 401
Atoxyl, 413
Human serum, 413
Mercury, 530
Salvarsan, 413
and Immunity, 415
Incidence
German E. Africa, 422–3
Uganda, 170
in Mice, action on, of mercury, 530
Immunity experiments with, 252–3
and Purification of mixed infection, 539–40
Neurological investigation in, 172–3
Paranagana, German East Africa, 423
T. brucei and, 170, 253
T. togolense of, 407

Sleeping Sickness—*cont.*
TRYPANOSOMIASIS—*cont.*
ANIMAL—*cont.*

SALAF OF DROMEDARIES, vectors of, 45

SURRA (*T. evansi* infection)
Action on, of
Abscess of fixation, in guinea-pigs, 249–51
" 88 " in Mice, 412
Transmission of mechanical, by *Tabanus striatus* Fabr., 311
Trypanotoxyl, formation of, 250

AVIAN, Japan, new Trypanosomes of, 430

EXPERIMENTAL
Action in, of
Abscess of fixation, 249–50
Aethylhydrocuprein, 530–1
Antimonial preparations, 247–8
Antimony trioxide, *see* Trixidin
Arsenobenzol, 37
Arsenosilver compounds, 37
Atoxyl, 249
Azotate of silver, 531
Benzidine, dyes of, 37
Bromine, 37, 38
Dioxydiaminoarsenobenzol, in combination with silver salts, 531–2
Eucerin ointment, 247, 248
Fluoresceine, 37
Iodine, 37, 38
Mehnarto's serum, 168
Mercury, alone and in combination with arsacetin, and with salvarsan, 530–1
Osmic acid, 37, 38
Quinine alkaloids, 533
Salts of metalloids and metals, 37
Salts of silver and compounds, 37, 531–2
Salvarsan, 173
Immunity experiments with, 252–3
Sieg's serum, 534
Staphylococcus vaccine, 37, 38
Trixidin, 247–8, 532–3
Trypan red, 37
with Silver salts, 532
Triphenyl-methane, 37
Tryposafrol, 249

Sleeping Sickness—*cont.*
TRYPANOSOMIASIS—*cont.*
EXPERIMENTAL—*cont.*
Antibodies in blood, in Salvarsan treatment, 173
Mouse-nagana, immunisation experiments with, 252–3
Nagana, action on, of quinine alkaloids, 533
Notes on changes from, 172
Trypanotoxins and immunisation experiments, 174
Symptoms no indication of trypanosome concerned, 429
in Various animals, 44, 244–5, 247–50, 252–4, 528
in Mice with single Trypanosomes, 429–30
Monkeys, 424
Rabbits, 424

HUMAN, in Antelopes, 415–6
Blood conditions in, 244
Case of laboratory infection: identification of virus, 407
Cerebrospinal fluid in, with Neosalvarsan treatment, 251–2
Clearances and, *see* Prophylaxis
Combined with malaria and syphilis, 527–8
Curability, 252
Diagnosis, by
Auto-erythrophagocytosis, 26
Complement deviation, 425
Epidemiology, 164–6
Game and wild animals in relation to, 24, 25, 31-5, 244,246–7,344–5,421,428
Incidence of infection
Afrique Mineure, 44
Angola, 528
Ashanti, 165
Brazil, 254
Congo, Belgian, 168, 243, 251, 527, 529

Symptoms, 94, 95
Treatment
Dietetic, 94, 95
Drug, 94, 95

Syphilis
Incidence
Tripoli, 235
Uganda, 342, 383
Prophylaxis, Uganda, 342, 383
Ruling *re*, Uganda, 383
Treatment
Galyl and ludyl, 402, 410
Serum of salvarsan-treated patients, 403
Treponema pallida
Action on, of galyl and ludyl, 402
Branched forms of, 406

TUBERCULOSIS, TROPICAL (among Native Races)
Incidence
British Guiana, 350
Nigeria, Southern, 333
Pathogenesis, diagnosis and prophylaxis, 220, 221, 228, 232–4
References to literature, lxxi

Typhoid Fever (Enteric)
Incidence
British Guiana, 350
India (army), 363
Indo-China (army), 363
Uganda, 342
United States and possessions (army), 363
Prophylaxis, 362–3
Transmission by
Ants (possible), 459
Human carriers, 363

TYPHUS FEVER, 563–6
Baths as preventives, 566
Blood conditions in, 565

Typhus Fever—*cont.*
Cutaneous eruption in, differentiated from that in typhoid fever, 564
Disinfection and disinfectants after, 565–6
Epidemics, *see* Incidence
Experimental, in men and monkeys, induced and spread by lice, 563–4
"Helios" apparatus for disinfection of clothes, etc., after, 566
House disinfection in Russia, 565–6
Incidence
Age and Sex, 564
Geographical
America, 564, 566
Balkan War area, 564
New Mexico, 564
Russia in Europe, 564
on Ships, 564
Lice as spreaders of hereditary infection, 563–4
in Man, induced and spread by lice-bites, 563
in Monkeys, induced and spread by lice-bites, 563
Prophylaxis, 564, 565, 566
References to literature, xxxi, lxxii
Serum complement deviation in, 565
Transmission by Lice, 564, 566
from Relapsing fever patient, 563
Treatment by Iodine, 565

Ulcerating Granuloma of pudenda, *see under* **MISCELLANEOUS**

Unclassed Fevers, *see under* **DENGUE,** *and* **FEVERS, UNCLASSED.**

UNDULANT FEVER, 210–19
Agglutination reaction in, 214 *et sqq.*
